Graphite heating and acid removal

EHP

Graphite hotplate

For batch laboratory sample preparation, including digestion, heating or acid removal. Functions and configuration depend on the model.

Technical features

- Uniform graphite heating for batch sample processing.
- PTFE anti-corrosion coating on graphite surfaces and housing.
- Variable-frequency operation after reaching the set temperature reduces power.
- Custom plate dimensions; separate control and programmed heating available.

Model and configuration guide

EHP

Model	Plate dimensions	Power	Overall dimensions
EHP-4P	400 × 300 mm	2800 W	380 × 480 × 245 mm
EHP-6P	600 × 400 mm	3600 W	480 × 680 × 245 mm
Temperature range	Ambient to 250 °C; high-temperature version: ambient to 450 °C
