Constant-Temperature Flue-Gas Sampling Probe

YQ-5233HW

Overview

The YQ-5233HW filters dust from and heats flue gas drawn from a duct, using a microcontroller.

Technical specifications

Parameter	Value
Heating voltage	DC 24 V

Technical features

- Uniform probe heating with convenient temperature setting and control.
- Rapid heating of the heated tube.
- Compact and lightweight.
- Low-voltage DC24 V heating.

Standard accessories

- Sampling probe
- Fabric bag
- Charger

Source and review notes

- The brochure provides no separate specification table or specific standard number for this product; the heating voltage shown is taken from its features.
- Product functions have not been independently tested.
- English translation has not received native-speaker technical review.
