Sampling-Probe Support

YQ-T02

Overview

The YQ-T02 supports sampling probes for field particulate and gas sampling in conventional ducts. The brochure describes compatibility with conventional and direct-reading particulate instruments, integrated flue-gas analyzers and flue-gas preprocessors, using the sampling port to secure the probe.

Technical specifications

Parameter	Value
Dimensions	230×60×36 mm
Compatible pipe diameter	63cm-105cm
Weight	0.39 kg

Technical features

- Hands-free support reduces field personnel effort.
- No tripod required.
- Not restricted by sampling-platform width, sampling-port height and similar conditions.
- Can adapt to sampling-duct conditions.
- Compact, lightweight and portable.
- Stainless-steel construction with high mechanical strength and corrosion resistance.

Source and review notes

- The brochure claims this is a patented product and an industry first; patent ownership and those claims have not been independently verified.
- The brochure prints a compatible pipe diameter of 63cm-105cm; retained as printed pending confirmation of applicability.
- English translation has not received native-speaker technical review.
